Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6 and 9 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Gammack(6835222).

Gammack teaches an electric vacuum cleaner(not shown) comprising an electric blower for generating a suction air stream, a dirt separation member(312) for separating and collecting therein dirt particles from the suction air stream, a centrifugal separation member(33) for centrifugally separating remaining dirt particles from a suctioned air stream that has passed through the dirt separation member, the centrifugal separation member being disposed in the dirt separation member(figure 4a), wherein the centrifugal separation member has an inlet port(324) into which the remaining dirt particles and the suctioned air stream are introduced, and an air stream guide portion( depending tube 322b) provided near the inlet port to direct the suctioned air stream to the inlet port. Gammack further teaches wherein the air stream guide portion runs substantially parallel to a direction of the suctioned air stream having passed through the dirt separation member.

***Allowable Subject Matter***

Claims 4,5,7, and 8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 4 includes subject matter which was indicated as allowable in the previous office action. Claim 5 depends on claim 4 and hence is also allowable.

Claims 7 and 8 include subject matter which was indicated as allowable in the previous office action.
